

LEVI'S LINK PROGRAM

Emergency Services Social Story

I will walk through the doors under the emergency sign.

There will be security guards there to keep me safe.

I will check in at the desk.

I will wait in the chairs for my name to be called.

A nurse will call my name and I will follow them into a room.

The nurse will ask a lot of questions.

The nurse will check my temperature. This does not hurt.

The nurse will check my blood pressure.
The machine will give my arm a tight hug.

I will stand on a scale and the nurse will weigh me.
It will beep when it is all done.

I will be asked to change into a new outfit.

There might be unusual sounds or lights.
This is okay.

I might go to a different room to get a cat scan or MRI.
I will hold still and listen to what the doctor and nurses tell me
to do. This does not hurt

I might go to a new room to get an X-Ray. Doctors may be wearing aprons to keep me and them safe.

The doctor will ask me to stand in front of a machine or lay on a table. I might need to lay on a wedge. I will hold still for a doctor to take pictures. This does not hurt.

I might need an IV put in.
I will leave it in until someone takes it out so I am safe.

At some point, I will get to pick a toy out of the toy box.

A nurse may bring in a cart to write down information throughout my stay.

A doctor or nurse may tell me some final instructions before telling me I can leave.

When it is time for me to go, I will walk and follow the exit signs leading out of the building.
