

# ORTHOPEDICS: BACK & SPINE

Meet McLaren

Our fellowship trained spine surgeons specialize in all aspects of surgical spinal care including the treatment of disk herniations, instability, fractures, tumors, scoliosis, and spinal stenosis. Most patients do not require surgery for spine problems and for those patients, recommendations will be made regarding medications, physical therapy, bracing, injections and/or alternative medical treatments.

## TREATMENTS AND PROCEDURES:

- Lumbar fusion
- Cervical laminoplasty
- Laminectomy
- Lumbar disc microsurgery
- Nucleoplasty
- Vertebral augmentation
- Vertebral body replacement (VBR)
- Vertebroplasty
